1. Organisation Overview

Name of Organisation

Lulu Glow Anti-Aging Cream

Brief History of Lulu Glow

Lulu Glow Anti-Aging Cream is a made-up skincare brand aimed at helping individuals keep their skin youthful and healthy. The brand emphasizes delivering high-quality skincare products that minimize visible aging signs like wrinkles, fine lines, and dullness. Lulu Glow was formed with the belief that skincare should be straightforward, efficient, and empowering. The brand uses gentle ingredients along with modern skincare science to create creams that hydrate, nourish, and guard the skin. Lulu Glow's goal is to make people feel assured and at ease in their natural beauty.

Mission

Lulu Glow's mission is to provide superior anti-aging skincare products that help people maintain healthy, glowing, and youthful skin while encouraging

confidence and self-care.

Vision

Lulu Glow's vision is to become a respected global skincare brand recognized for effective anti-aging products that enhance natural beauty and promote healthy skin.

Target Audience

The target audience for Lulu Glow Anti-Aging Cream involves:

- Women and men aged 25–55 interested in skincare and anti-aging products
- Individuals wishing to lessen wrinkles, fine lines, and dull skin
- Customers who appreciate quality skincare products and self-care routines
- Online shoppers who prefer convenient e-commerce skincare buying

2. Goals and Objectives

The main aim of the Lulu Glow website is to advertise the skincare brand and sell anti-aging cream online while educating customers on proper skincare routines.

Website Goals

- Boost the brand's online presence
- Promote Lulu Glow Anti-Aging Cream
- Provide detailed product information and skincare advantages
- Educate users on skincare and anti-aging routines
- Foster online purchases

Key Performance Indicators (KPIs)

To evaluate the website's success, the following KPIs will be tracked:

- Monthly website visitors
- Number of product purchases
- Conversion rate (percentage of visitors who make a purchase)

- Average time spent on the website
- Number of newsletter subscriptions

3. Current Website Analysis

Lulu Glow Anti-Aging Cream is a new skincare brand and currently lacks an official website. Therefore, a new website will be developed to establish the brand's online presence and facilitate online purchases. However, an examination of competitor skincare websites suggests that successful sites typically include the following features.

Strengths Observed in Competitor Websites

- High-quality product images
- Clear skincare benefits and ingredient details
- Easy page navigation
- Mobile-friendly design

- Customer reviews and ratings

Weaknesses in Competitor Websites

- Complicated product descriptions
- Cumbersome checkout processes
- Unclear skincare instructions
- Poor mobile optimization on some sites

Areas for Improvement

The Lulu Glow website will enhance these weaknesses by:

- Offering clear and simple product descriptions
- Creating an easy and secure checkout process
- Providing skincare tips and instructions
- Ensuring the website is mobile-friendly

4. Proposed Website Features and Functionality

The Lulu Glow website will consist of the

following key pages and features.

Homepage

- Introduction to the Lulu Glow Anti-Aging Cream brand
- Featured skincare products
- Promotional banners and special offers
- “Shop Now” buttons to encourage purchases

About Us Page

- The story of the brand's creation
- Brand mission and skincare values
- Information about the importance of skincare and self-care

Products Page

The products section will feature:

- Lulu Glow Anti-Aging Cream
- Product images and descriptions
- Benefits and key ingredients

- Instructions for using the cream
- Product price and purchase option

Contact Page

- Contact form for customer inquiries
- Customer support email address
- Social media links
- Shopping Cart and Checkout
- Secure checkout process
- Multiple payment choices
- Order confirmation system

Additional Features

- Customer reviews and ratings
- Newsletter subscription for skincare tips
- Social media integration
- Mobile-friendly design

5. Design and User Experience

The website design will aim to create a clean, sophisticated, and calming beauty-

focused space for skincare customers.

Colour Scheme (Proposed Colour Palette)

- Soft Pink – symbolizes beauty and skincare
- Lavender – linked with calmness and self-care
- White – gives a clean and modern appearance
- Rose Gold accents – introduces elegance and luxury

Typography (Font Choices and Hierarchy)

- Headings: Poppins, Montserrat
- Body Text: Open Sans, Roboto

These fonts offer a contemporary, professional, and easy-to-read website design.

Layout and Design

The website will utilize a minimal and

contemporary layout that emphasizes displaying skincare products clearly. Large product images and well-balanced spacing will make the site visually attractive and easy to navigate.

User Experience Considerations

The website will feature the following user-friendly elements:

- Easy page navigation
- Mobile-responsive design for smartphones and tablets
- Clear product information and skincare benefits
- Simple and secure checkout process
- Easy-to-follow instructions for using the cream

Low-Fidelity Wireframes

Low-fidelity wireframes will be created to depict the layout of the homepage, product

page, and checkout page before finalizing the website design.

6. Technical Requirements

The website will need the following technical elements.

Hosting and Domain Name

- Domain Name: www.luluglowcream.com
- Web Hosting Provider: Domains.co.za

Programming Languages and Frameworks

The website will be developed using:

- HTML – for website structure
- CSS – for styling and layout
- JavaScript – for interactive elements

7. Timeline and Milestones

Phase Activity Time

Phase 1 Research skincare market and

analyze competitor websites Week 1

Phase 2 Write website proposal and define goals and objectives Week 2

Phase 3 Create sitemap and low-fidelity wireframes Week 3

Phase 4 Design the website interface Week 4

Phase 5 Develop website using HTML, CSS, and JavaScript Week 5–6

Phase 6 Test website for usability and functionality Week
